# 4 Tokenized Money Use Cases Banks Can Bring to Corporate Treasury Customers

Bank treasury services unlock these four capabilities for corporate clients without requiring in-house blockchain expertise.

## 1 Supplier invoice payments

Pay global suppliers in stablecoins - instantly, with near-zero fees and a full on-chain audit trail.

## 2 Getting paid in tokenized deposits

Receive customer payments as bank-issued tokenized deposits - regulated, redeemable, and programmable from day one.

## 3 Auto-sweep into yield

Rule-based sweeps move idle stablecoin balances into interest-bearing tokenised deposit accounts automatically.

## 4 Fiat ↔ tokenized conversion

Seamlessly convert between fiat and tokenized money on- and off-ramps - with best-in-class liquidity and compliance.
